

LOGICAL REASONING & ANALYTICAL SKILLS

QUESTION BANK

MODULE I: DATA ARRANGEMENTS

SHORT ANSWERS

- 1) Seven girls G1, G2, G3, G4, G5, G6, and G7 are sitting around a circular table facing the center (not necessarily in the same order). G6 is second to the left of G1. G7 is second to the left of G6. G5 is third to the right of G2. G5 is not the immediate neighbour of G6, G4 is third to the right of G3. Who is second to the left of G7?
- 2) Seven people, A, B, C, D, E, F and G are sitting in a straight line, facing north. Only three people sit to the left of D. Only two people sit between D and A. B sits fifth to the right of C. G sits to the immediate right of E but somewhere to the left of A. Who sits to the extreme right?
- 3) Eight friends A, B, C, D, E, F, G and H are seated in a straight line and all of them are facing north, but not necessarily in the same order. B sits second to right of F. F sits at one of the extreme ends of the line. Only three people sit between B and E. C sits third to the left of D. Only two people sit between D and A. G is not an immediate neighbour of E. Who is sitting on the immediate left of B?
- 4) Five men A, B, C, D and E read a newspaper. The one who reads first gives it to C. The one who reads last had taken from A. E was not the first or last to read. There were two readers between B and A.
 - (I) B passed the newspaper to whom?
 - (II) Who read the newspaper last?
- 5) There are five houses P, Q, R, S and T. P is right of Q and T is left of R and right of P. Q is right of S. which house is in the middle?

6) Eight executives J, K, L, M, N, O, P & Q are sitting around a circular table for a meeting. J is second to the right of P who is third to the right of K. M is second to the left of O who sits between P & J, L is not a neighbor of K or N.

(i) Who is opposite to Q?

(ii) Who is second to the left of J?

7) P, Q, R, S and T are sitting in a straight line, facing north. S is an Immediate neighbor of both P and R. R is an immediate neighbor of both S and Q. Q is an Immediate neighbor of both R and T. who are thy immediate neighbors of Q?

8) A, B, C, D, E, F, G and H are sitting around a circle, facing the center. A sits fourth to the right of H while second to the left of F. C is not the neighbor of F and B. D sits third to the right of C. H never sits next to G.

(i) Who is sitting between B & D?

(ii) Who is third to the right of F?

9) Five persons are standing in a line. One of the two persons at the extreme ends is a professor and the other a business man. An advocate is standing to the right of a student. An author is to the left of the business man. The student is standing between the professor and the advocate. Counting from the left, the advocate is at which place?

10) A, P, R, X, S and Z are sitting in a row. S and Z are in the centre, and A and P are at the ends. R is sitting on the left of A. Then who is sitting on the right of P?

LONG ANSWERS

1) Read the following information carefully and answer the questions given below:

(i) A, B, C, D, E, F and G are sitting around a circle and are facing the centre.

(ii) G is second to the left of C, who is to the immediate left of F.

(iii) A is third to the left of E.

(iv) B is between D and E.

1. Which of the following is false?

(a) A is fourth to the right of E.

(b) G is to the immediate right of D.

(c) F is third to the right of D.

(d) B is to the immediate left of D.

2. Which of the following is true?

(a) C is fourth to the left of B.

(b) A is to the immediate right of G.

(c) D is second to the left of E.

(d) B is second to the right of G.

3. Which of the following pairs has the first person sitting to the immediate left of the second person?

(a) BE

(b) CA

(c) GD

(d) DG

4. Which of the following has the middle person sitting between the remaining two?

(a) FCE

(b) EFB

(c) DEB

(d) None of these

5. Which of the following is the position of F

(a) Fourth to the right of D

(b) To the immediate left of C

(c) Between A and E

(d) To the immediate right of A

2) . Study the given information carefully and answer the questions that follow:

i) A, B, C, D, E, F and G are sitting on a wall and all of them are facing east.

ii) C is on the immediate right of D.

iii) B is at an extreme end and has E as his neighbor.

iv) G is between E and F. (v) D is sitting third from the south end.

1. Who is sitting to the right of E?
2. Which of the following pairs of people are sitting at the extreme ends?
3. Name the person who should change place with C such that he gets the third place from the north end.
4. Immediately between which of the following pairs of people is D sitting?
5. Who is sitting to the left of Ess?

3) Study the following information carefully and answer the questions given below:

Eight people- S, R, N, L, M, T, O and P are sitting in a circle facing the center. All eight belong to different professions- reporter, doctor, cricketer, teacher, accountant, shopkeeper, painter and supervisor. They are not necessarily seated in the mentioned order. M is sitting third to the left of O. The doctor is to the immediate right of M and M is not a reporter. R is sitting fourth to the right of P. Neither R nor P is an immediate neighbour of M. T is a teacher and is sitting third to the right of the doctor. The shopkeeper is sitting second to the left of the teacher. The painter is sitting second to the left of M. S the cricketer is sitting exactly between T and P. The accountant is sitting second to the right of the cricketer. N is sitting third to the left of T.

- (1) Who among the following is a supervisor?
- (2) Who among the following is a reporter?
- (3) Who is sitting on the immediate left of the shopkeeper?
- (4) How many people sit between teacher and supervisor?

4. Amit, Bablu, Ramesh, Deepak, Imran, Sunil, and Sanju are sitting around a circular table facing opposite the center. Amit does not sit adjacent to Imran and Sanju Bablu does not sit adjacent to Amit. Sanju sits second to the left of Imran. Ramesh sits fourth to the left of Amit. Deepak and Bablu sit adjacent to each other

- 1) Who sits to the immediate right of Amit?
- 2) Who sits second to the left of Imran?
- 3) Who sits fourth to the left of Amit?
- 4) Which of the following pair sits adjacent to each other?
- 5) Amit is not adjacent to which of the following?

5) Eight friends A, B, C, D, E, F, G and H are sitting around a circular table with equal distance between each other but not necessarily in the same order. Some of them are facing the centre while some are facing outside the centre. B sits third to the left of A. Only three persons sit between B and H. E sits to the immediate right of H. Only one person sits between E and D. The immediate neighbours of E face opposite direction. G sits second to the right of D. Both G and C face the same direction as H. Immediate neighbours of F faces opposite direction. E faces inside. D faces a direction opposite to that of B.

- 1) How many persons are sitting between A and H (clockwise)?
- 2) Who is sitting second to the left of G?
- 3) Which of the following pairs are the immediate neighbor's of E?
- 4) Who is sitting immediately to the right of H?
- 5) Who is sitting immediate to the left of E?

6) Eight executives J, K, L, M, N, O, P & Q are sitting around a circular table for a meeting. J is second to the right of P who is third to the right of K. M is second to the left of O who sits between P&J, L is not a neighbor of K or N.

- i) Who is opposite to Q?**
- (ii) Who is second to the left of J?**
- (iii) Who is sitting between K and M?**
- (iv) Who is second to the right of K?**
- (v) Who are immediate neighbors of N?**

7) M, N, P, R, T, W, F and H are sitting around a circle facing the center, P is third to the left of M and second to the right of T. N is second to the right of P. R is second to the right of W who is second to the right of M. F is not an immediate neighbour of P.

- (i) Who are immediate neighbors of H?**
- (ii) What is the position of R with respect to N?**
- (iii) How many people sit between N&T?**
- (iv) Who is on the immediate right of W?**

8) A, B, C, D, E, F, G and H are sitting around a circle facing the center. E and G always sit next to each other. D sits third to the right of C. F sits second to the left of H. C never sits next to A while D never sits next to G. H is not the neighbor of D and C.

- i) Who is sitting on the immediate right of D?**
- (ii) Who is fourth to the left of A?**
- (iii) Who are immediate neighbor's of G?**
- (iv) If C and H interchange their places, who will be second to the left of E?**
- (V) What is the position of D with respect to G?**

9) Eight persons L, M, N, O, P, Q, R and S are sitting at the circular table facing outside but not necessarily in the same order. P sits second to the right of R. Two persons are sitting between S and Q. Q sits adjacent to R. M Sits Third to the right of L. M and P are not immediate neighbors. L sits second to the left of O. The number of persons sitting N and M is the Same as between N and S.

- (i) who is sitting 3rd to the right of N?
- (ii) who is sitting 2nd to the left of P?
- (iii) who are sitting opposite to each other?
- (iv) who is sitting 3rd to the right of Q?
- (v) who are sitting immediate neighbors of L?

10) Six friends P, Q, R, S, T and U are sitting around the hexagonal table each at one corner and are facing the centre of the hexagonal. P is second to the left of U. Q is neighbour of R and S. T is second to the left of S.

1. Who is sitting immediately to the left of P?

2. Who is sitting opposite S?

3. Which of the following pairs are immediate neighbours?

A) P and Q B) U and R C) Q and S D) T and R

3. Who is sitting immediately to the right of U?

4. If Q is the reference point, who is sitting second to the left of Q?

A) T B) U C) P D) R

MODULE 2: DATA SUFFICIENCY

SHORT ANSWERS

1) Total money with Naresh and Ajay is 28 per cent of that with Usman. How much money is Ajay having?

I. Usman has got Rs 75000.

II. The ratio of money of Naresh to money held by Ajay is 1: 3.

- 1) If the data under statement I alone is sufficient to answer the question.
- 2) If the data under statement II alone is sufficient to answer the question.
- 3) If the data under both the statements (I and II) together are necessary to answer the question.
- 4) If the question cannot be answered even by using both the statements together.

2) What is the value of $(p + r): r$?

I) The ratio of $p: q = 1:5$

II) The ratio of $q: r = 3:2$

- 1) If the data under statement I alone is sufficient to answer the question.
- 2) If the data under statement II alone is sufficient to answer the question.
- 3) If the data under both the statements (I and II) together are necessary to answer the question.
- 4) If the question cannot be answered even by using both the statements together.

3) Gaurav ranks eighteenth from the top in a class. What is his rank from the last?

I. There are 47 students in the class.

II. Jatin, who ranks 10th in the same class, ranks 38th from the last.

- A) Statement I alone is sufficient.
- B) Statement II alone is sufficient.
- C) Both I and II together are sufficient.
- D) Neither I nor II

4)Question: In which year was Rahul born?

Statement I: Rahul at present is 25 years younger to his mother.

Statement II: Rahul's brother, who was born in 1964, is 35 years younger to his mother.

- A. If the data in statement I alone is sufficient to answer the question, while the data in statement II alone is not sufficient to answer the question.
- B. If the data in statement II alone is sufficient to answer the question, while the data in statement I alone is not sufficient to answer the question.
- C. If the data either in statement I alone or in statement II alone is sufficient to answer the question.
- D. If the data in both statement I and II together are not sufficient to answer the question.
- E. If the data in both statement I and II together are necessary to answer the question.

5)On which date of the month was Anjali born in February 2004 ?

Statement I : Anjali was born on an even date of the month.

Statement II : Anjali's birth date was a prime number.

- III) If the data in statement I alone is sufficient to answer the question, while the data in statement II alone is not sufficient to answer the question.
- IV) If the data in statement II alone is sufficient to answer the question, while the data in statement I alone is not sufficient to answer the question.
- V) If the data either in statement I alone or in statement II alone is sufficient to answer the question.
- VI) If the data in both statement I and II together are not sufficient to answer the question.
- VII) If the data in both statement I and II together are necessary to answer the question.

6)Given that

- 1) A is the mother of B. 2) C is the son of A.
- 2) D is the brother of E. 4) E is the daughter of B.

Who is the grandmother of E ?

7)i) F is the brother of A. ii) C is the daughter of A.

i) K is the sister of F. iv) G is the brother of C.

who is the uncle of G?

8)Pointing towards a person, a man said to a woman, "His mother is the only daughter of your father." How is the woman related to that person?

9)Pointing to a photograph of a boy Suresh said, "He is the son of the only son of my mother." How is Suresh related to that boy?

10)Pointing to a photograph of a man Lata says, "He is the son of the only son of my grandfather." How is the man in the photograph related to Lata?

LONG ANSWERS

1)What is the area of the rectangular plot?

I)The perimeter of the plot is 208 metres.

II) The length is more than the breadth by 4 metres.

- 1)If the data under statement I alone is sufficient to answer the question.
- 2)If the data under statement II alone is sufficient to answer the question.
- 3) If the data under both the statements (I and II) together are necessary to answer the question.
- 4) If the question cannot be answered even by using both the statements together.

2)What is the middle number in a set of 13 numbers?

I) The average of first 7 numbers is 30 and the average of last 7 numbers is 40.

2)The average of the 13 numbers is 46.

- 1) If the data under statement I alone is sufficient to answer the question.
- 2) If the data under statement II alone is sufficient to answer the question.
- 3) If the data under both the statements (I and II) together are necessary to answer the question.
- 4) If the question cannot be answered even by using both the statements together.

3)What is the speed of the train?

I) Length of the train is 500 m.

II) The train crosses an electric pole in 10 sec.

- 1) If the data under statement I alone is sufficient to answer the question.
- 2) If the data under statement II alone is sufficient to answer the question.
- 3) If the data under both the statements (I and II) together are necessary to answer the question.
- 4) If the question cannot be answered even by using both the statements together.

4)How many employees of Bank Z opted for VRS?

I. 18% of the 950 officer cadre employees and 6% of the 1100 other cadre employees opted for VRS.

II. 28% of the employees in the age-group of 51 to 56 and 17% of the employees in all other age-groups opted for VRS.

- 1) If the data under statement I alone is sufficient to answer the question.
- 2) If the data under statement II alone is sufficient to answer the question.
- 3) If the data under both the statements (I and II) together are necessary to answer the question.
- 4) If the question cannot be answered even by using both the statements together.

5) Prasad and Hari can complete a work in 12 days and 15 days respectively. Who work on the last day, if they were on alternate days?

I) Prasad works on the second day.

II) Both of them can complete the work in $6\frac{2}{3}$ days.

1) If the data under statement I alone is sufficient to answer the question.

2) If the data under statement II alone is sufficient to answer the question.

3) If the data under both the statements (I and II) together are necessary to answer the question.

4) If the question cannot be answered even by using both the statements together.

6) Study the following information carefully and answer the questions given below it. There are six persons A, B, C, D, E and F. C is the sister of F. B is the brother of E's husband. D is the father of A and grandfather of F. There are two fathers, three brothers and a mother in the group.

- 1. Who is the mother?**
- 2. Who is E's husband?**
- 3. How many male members are there in the group?**
- 4. How is F related to E?**
- 5. Which of the following is a group of brothers?**
(a) ABF (b) ABD (c) BFC (d) BDF

7) Study the following Information and answer the questions given below it:

All the six members of a family A, B, C, D, E and F are travelling together. B is the son of C but C is not the mother of B. A and C are a married couple. E is the brother of C. D is the daughter of A. F is the brother of B.

- 1. How many male members are there in the family?**
- 2. Who is the mother of B?**
- 3. How many children does A have?**
- 4. Who is the wife of E?**
- 5. Which of the following is a pair of females?**
(a) AE (b) BD (c) DF (d) AD

8) 'A + B' means 'A is the father of B'; 'A - B' means 'A is the wife of B';
'A × B' means 'A is the brother of B'; 'A ÷ B' means 'A is the daughter of B'.

1) If $P \div R + S + Q$, which of the following is true?

- a) P is the daughter of Q. b) Q is the aunt of P.
- c) P is the aunt of Q. d) P is the mother of Q.

2. If $P - R + Q$, which of the following statements is true?

- (a) P is the mother of Q. (b) Q is the daughter of P.
- (c) P is the aunt of Q. (d) P is the sister of Q.

3. If $P \times R \div Q$ which of the following statements is true?

- (a) P is the uncle of Q. (b) P is the father of Q.
- (c) P is the brother of Q. (d) P is the son of Q.

4. If $P \times R - Q$ which of the following statements is true?

- (a) P is the brother-in-law of Q. (b) P is the brother of Q.
- (c) P is the uncle of Q. (d) P is the father of Q.

5. If $P + R + Q$ which of the following is true?

- (a) P is the brother of Q. (b) P is the son of Q.
- (c) P is the husband of Q. (d) P is the father of Q.

9) All the six members of a family A, B, C, D, E and F are travelling together. B is the son of C but C is not the mother of B. A and C are a married couple. E is the brother of C. D is the daughter of A. F is the brother of B.

1) How many male members are there in the family?

2) Who is the mother of B?

3) How many children does A have?

4) Who is the wife of E?

5) Which of the following is a pair of females?

10) Read the information given below and answer the questions that follow:

- I. A, B, C, D, E and F are six members of a family.**
- II. One couple has parents and their children in the family.**
- III. A is the son of C and E is the daughter of A.**
- IV. D is the daughter of F who is the mother of E.**

1. Who are the male members in the family?

- (a) A and C (b) C and F (c) A, B and D (d) Cannot be determined

2. Which of the following pairs is the parents of the children?

- (a) BC (b) CF (c) BF (d) None of these

3. Which of the following pairs is the parents of the couple?

- (a) AB (b) BC (c) AF (d) CF

4. How many female members are there in the family?

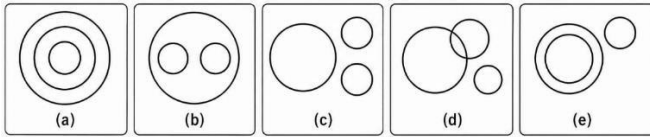

- (a) Two (b) Three (c) Four (d) Cannot be determined

5. What relationship do D and E bear to each other?

- (a) Sister and Brother (b) Mother and son (c) Grandmother and Granddaughter (d) Sister

MODULE III: VENN DIAGRAM&STAEMENTS AND CONCLUSIONS & LOGICAL DEDUCTION SHORT ANSWERS

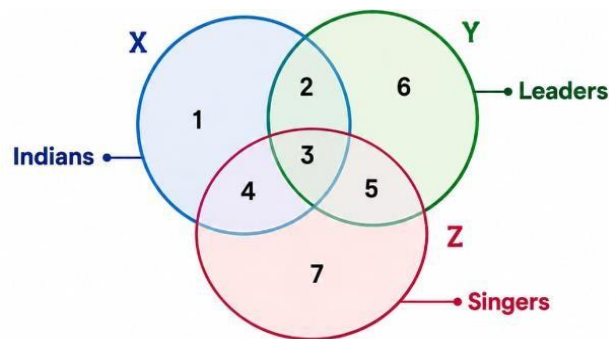

DIRECTIONS (Questions 1 to 2): Each of the questions below contains three elements. These three elements may or may not have some linkage. Each group of the elements may fit into one of the diagrams at (a), (b), (c), (d) and (e). You have to indicate groups of elements in each of the questions which fit which into which of the diagrams given below. The letter indicating the diagram is the answer.

1. Vegetables, Potato, Cabbage

2. Table, Chair, Furniture

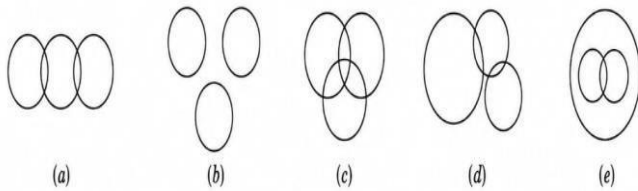

2)Directions (Questions 1 to 2): Study the following figure carefully and answer the given questions

1). Which region denotes Indian leaders who are not singers?

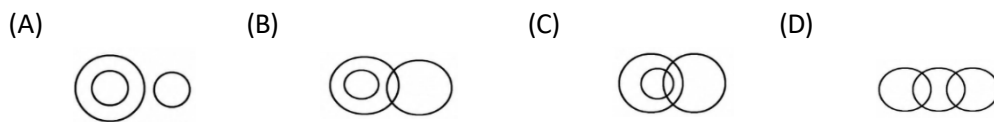

2).Which region represents Indian leaders who are singers?

3) Each of these questions below contains three groups of things. You are to choose from the following five lettered diagrams, the one that depicts the correct relationship among the groups of things in each question.

1. Tennis fans, Cricket Players, Students
2. Flowers, Clothes, White

4) Here four diagrams (A), (B) and (D) are given. There are three elements in each the questions. Choose the Venn-diagram best illustrates the relationship among the given elements.

- (I) Uncle, Rich People, Relatives
- (II) Insects, Flies and Dogs

I) Which of the following diagrams indicates the best relation between **Women, Mothers and Engineers?**

5) Here four diagrams (A), (B) and (D) are given. There are three elements in each the questions. Choose the Venn-diagram best illustrates the relationship among the given elements.

- (I) Uncle, Rich People, Relatives
- (II) Insects, Flies and Dogs

6) Statements: All mangoes are apples

- Conclusions: I. Some apples are mangoes
 II. All apples are mangoes.
 III. Some mangoes are apples.
 IV. Some apples are not mangoes.
 V. Some mangoes are not apples.
 VI. No mango is apple.
 VII. No apple is mango.

- (A) Only I follows
- (B) Only I and III follows
- (C) Only II follows
- (D) None follows

7) Statements: Some dogs are cats

Conclusions: I. Some cats are dogs.

II. All cats are dogs.

III. All dogs are cats.

IV. No dog is cat.

V. No cat is dog.

VI. Some cats are not dogs.

VII. Some dogs are not cats.

(A) Only I, II and III follows (B) Only I and II follows

(C) Only I follow

(D) None follows

8)Statements: No book is copy

Conclusions: I. No copy is book.

II. Some copies are not books.

III. Some books are not copies.

IV. All books are copies.

V. All copies are books.

VI. Some copies are books.

VII. Some books are copies.

(A)Only I follow

(B) Only II follows

(C) Only I, II and III follows (D) None follows

9)Statements: Some cars are not buses

Conclusions: I. Some buses are not cars.

II. No bus is car.

III. No car is bus.

IV. Some buses are cars.

V. Some cars are buses.

VI. All cars are buses.

VII. All buses are cars.

(A) Only I follow

(B) Only II follows

(C) Only III follows

(D) None follows

10)Statements: (1) All rains are water

(2) All water are blue

Conclusions: I. All rains are blue.

II. Some rains are blue.

III. All blue are rains.

IV. Some blue are rains.

V. No rain is blue.

VI. Some rains are not blue.

VII. Some blue are not rains.

(A) Only I, II and IV follow

(B) Only I and II follows

(C) Only II and III follows

(D) Only III and IV follow

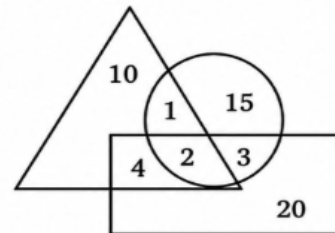

LONG ANSWERS

1) There are total 700 students in a class. 200 students passed in Mathematics, 150 students in English and 300 students in Hindi. 50 students passed in Mathematics and English and 20 students passed in Hindi and Mathematics. 30 students passed in English and Hindi only. 10 students passed in all three subjects English, Hindi and Mathematics. Answer the following questions based on this information.

- (i) What is the number of students who have passed?
- (ii) What is the number of students who have failed in all three subjects?
- (iii) What is the number of students who have failed in Hindi only?
- (iv) What is the number of students who have failed in English only?
- (v) What is the number of students who have failed in Mathematics and Hindi only?

2) In the following figure, triangle represents the engineers; Circle represents the doctors and rectangle represents the architects. On the basis of the above diagram, answer the following questions.

- (I) How many engineers are there who are only doctors
- (II) How many engineers are there who are doctors?
- (III) How many engineers are there who are not doctors
- (IV) How many only engineers are there?
- (V) How many total engineers are there?

3) A survey of 100 people was conducted to find their preferences for three types of movies: Action, Comedy, and Drama. The survey results showed:

- 45 people like Action movies. 50 people like Comedy movies.
- 60 people like Drama movies. 25 people like both Action and Comedy.
- 30 people like both Comedy and Drama. 20 people like both Drama and Action.
- 10 people like all three types of movies

- 1) Only Action movies like?
- 2) Only Comedy movies like?
- 3) Only Drama movies like?
- 4) All three movies like?
- 5) Only Action and Drama movies like?

4) In a class, 30 students passed in Mathematics, 50 students passed in English and 80 students passed in Reasoning. 5 students passed in both Mathematics and English. 15 students passed in English and Reasoning and 10 students passed in Mathematics and Reasoning. 2 students passed in English, Reasoning and Mathematics. Answer the following questions based on this information:

1) How many students have passed only in Mathematics?

- (A) 17 (C) 18 (B) 15 (D) 20

2) How many students have passed only in English?

- (A) 35 (B) 30 (C) 31 (D) 32

3) How many students have passed only in Reasoning?

- (A) 55 (B) 57 (C) 60 (D) 62

4) What is the total number of students?

- (A) 150 (B) 160 (C) 132 (D) 130

5) How many students have passed only in Reasoning and English?

- (A) 15 (B) 16 (C) 13 (D) 18

5) There are total 800 students in a class. 300 students failed in Mathematics, 200 students in English and 200 students in science. 50 Students failed in Mathematics and English only and 60 students failed in English and Science only. 70 students failed in Science and Mathematics. 5 Students failed in all three subjects Mathematics, Science and English. Answer the following questions based on this information:

• What is the number of students who passed in science only?

- (A) 50 (B) 100 (C) 150 (D) 30

• What is the number of students who passed in Mathematics only?

- (A) 80 (B) 40 (C) 60 (D) 50

3) What is the number of students who passed in science and mathematics only?

- (A) 80 (B) 85 (C) 70 (D) 90

4. What is the number of students who passed in three subjects?

- (A) 290 (B) 275 (C) 260 (D) 285

5. How many students have passed in Mathematic and English?

- (A) 355 (B) 375 (C) 365 (D) 345

6)Statements: (1) All rains are water.

(2) No water is blue.

Conclusions: I. All rains are blue.

II. Some rains are blue.

III. Some blue are rains

IV. All blue are rains.

V. No rain is blue.

VI. No blue is rain.

VII. Some rains are not blue.

VIII. Some blue are not rains

(A) Only I and II follow

(B) Only I, II, V and VI follow

(C) Only V, VI, VII and VIII follow

(D) Only VII and VIII follow

7)Statements: (1) All A are B.

(2) No B is C.

(3) No A is D.

Conclusions: I. All A are C.

II. No A is C.

III. Some D are not B.

IV. Some B are not D.

V. No C is D.

VI. No D is C.

VII. All C are D.

(A) Only II and III follow

(B) Only III and IV follows

(C) Only II and IV follows

(D) None follows

8)Statements: (1) All boys are actors.

(2) All hero are zero.

(3) No actor is zero.

Conclusions: I. All boys are hero.

II. Some boys are hero.

III. All hero are boys.

IV. Some hero are boys.

V. No hero is boy.

VI. No boy is hero.

VII. Some hero are not boys.

VIII. Some boys are not heros.

(A) Only I ,II,III and IV follow (B) Only V and VI follow

(C) Only VII and VIII follow (D) Only V,VI,VII and VIII follow

LOGICAL DEDUCTION USING VENNDIAGRAM

9)Statements: (I) All roses are flowers.

(II) All flowers are plants.

(III) No plants are stones.

10)Statements: (I) No apples are oranges.

(II) All apples are fruits.

MODULE IV: VALIDITY & LOGICAL REASONING PUZZLES

SHORT QUESTION

1) Statements: - All Gliders are Kites.

All Kites are Aeroplanes.

No Aeroplane is a Chopper.

Conclusions: I. No Glider is a Chopper.

II. Some Aeroplanes are Gliders

- A) Both conclusions I and II follow B) Only conclusion I follows
C) Only conclusion II follows D) Either conclusion I or II follows
E) Neither conclusion I nor II follows

2) Statements: - All Papers are Books.

Some Books are Journals.

Conclusions: I. Some Papers are Journals.

II. Some Journals can be Papers.

- A) Both conclusions I and II follow B) Only conclusion I follows
C) Only conclusion II follows D) Either conclusion I or II follows
E) Neither conclusion I nor II follows

3) Statements: Only Melons are Sweet.

Some Melons are Green.

Conclusions: I. Some Sweet can be Green.

II. No Sweet is Green.

- A) Both conclusions I and II follow B) Only conclusion I follows
C) Only conclusion II follows D) Either conclusion I or II follows
E) Neither conclusion I nor II follow

4) Statements: - No Blue is Pink.

No Pink is Green.

Conclusions: I. Some Blue are Green.

II. No Green is Blue.

- A) Both conclusions I and II follow B) Only conclusion I follows
C) Only conclusion II follows D) Either conclusion I or II follows
E) Neither conclusion I nor II follows

5) Statements: - Only a few Keys are Locks.
- No Lock is a Door.

Conclusions: I. All Keys can never be Doors.

II. Some Keys are not Locks.

- A) Both conclusions I and II follow B) Only conclusion I follows
C) Only conclusion II follows D) Either conclusion I or II follows
E) Neither conclusion I nor II follows

6) Four persons A, B, C, D participated in a race in four different four wheelers. The four wheelers were named Thar, Scorpio, XUV 300 and Bolero. A won the race but he did not own the Thar. C owns the Scorpio, but he is not the second one to complete the race. The person who owns the Thar completed the race immediately before B. B does not own the XUV 300

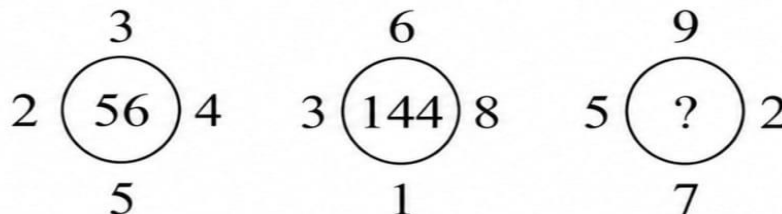

A) What is the rank of C ?

- (A) 1 (B) 2 (C) 4 (D) 3

A) Who owns the XUV300 car ?

- (A) D (B) C (C) B (D) A

7) What number will replace the question mark?

8) P, Q, R and S like different subjects: Maths, Physics, Chemistry and Biology. P likes Chemistry, Q does not like Maths or Biology, R likes Biology, and S does not like Physics.

A) Which subject does Q like?

B) Which subject does S like?

9) Five students A, B, C, D and E have presentations from Monday to Friday, one student each day. A presents on Wednesday, B presents immediately after D, E presents on Friday, and C presents before A.

A) Who presents on Tuesday?

B) Who presents immediately before B?

10) Seven people A, B, C, D, E, F and G live on seven different floors numbered 1 to 7 from bottom to top. A lives on the fourth floor. B lives immediately above C. D lives on the top floor. E lives below A but above F. G lives immediately below A.

A). Who lives on the 3rd floor?

B). Who lives immediately above F?

LONG QUESTION

1.Statements: 1. All A are B.
 2.Some B are C.
 3.No C is D.
 4.Some D are A.
Conclusions: I. Some B are not C.
 II. Some A are not C.

2.Statements: 1. All P are Q.
 2.All Q are R.
 3.No R is S.
 4.Some T are P.
Conclusions: I. Some T are not S.
 II. No P is S.

3.Statements: 1. Some M are N.
 2. No N is O.
 3. All O are P.
 4. Some P are M.
Conclusions: I. Some M are not O.
 II. Some M are O.

4.Statements: 1. All teachers are readers.
2. Some readers are writers.
3. No writer is a singer.
4. All singers are artists.

Conclusions: I. Some readers are not singers.
II. No teacher is a singer.

5.Statements: 1. No A is B.
2. Some B are C.
3. All C are D.
4. Some D are A.

Conclusions: I. Some D are not B.
II. Some A are not C

6. Each of the five players - Rohit, Rahul, Virat, Dravid and Sehwag – plays a different game among Cricket, Hockey, Badminton, Basketball and Tennis. They live in five different cities – Mumbai, Kolkata, Delhi, Chennai and Hyderabad. The following information is also known about them:(i) Dravid plays neither Cricket nor Basketball. (ii) Rahul is not a Basketball player (iii) Sehwag does not play Tennis and the Tennis player does not live in Delhi. (iv) Sehwag and Virat do not live in Chennai or Hyderabad and neither of them plays Hockey or Basketball. (v) The person living in Chennai plays neither Tennis nor Badminton. (vi) Rohit and Rahul do not play Tennis or Badminton and they do not live in Delhi or Chennai. (vii) The cricketer does not live in Hyderabad or Mumbai.

1) Which game does Rohit play?

2) Which city does Rahul live in?

3) Which game does Dravid play?

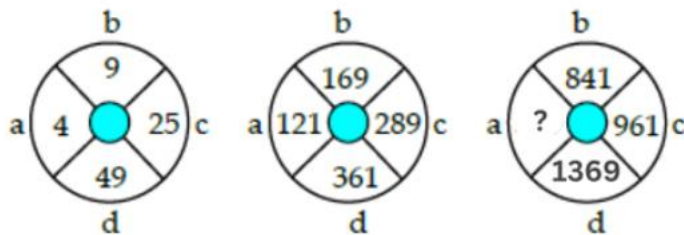

4) Who plays Tennis?

5) Who lives in Chennai?

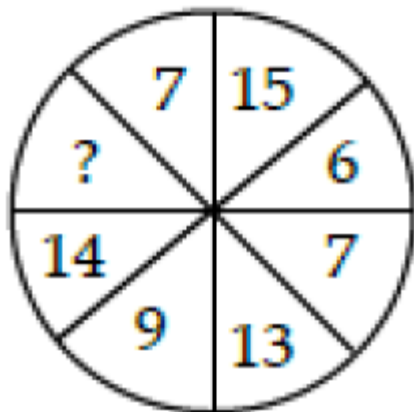

7. Anand, Bhavna, Charlie, Dhavan, Evan, and Farah are six students, each belonging to a different city, viz. Delhi, Agra, Kanpur, Lucknow, Patna, and Jaipur, not necessarily in the same order. Each of them got selected in different companies through NxtWave, viz. Amazon, Accenture, TCS, Infosys, Capgemini, and CGI, not necessarily in the same order. Bhavna belongs to Jaipur but did not get selected in either Capgemini or Amazon. Dhavan doesn't belong either to Delhi or to Lucknow, but got selected for Accenture. The one who got selected in Capgemini doesn't belong to Jaipur. The one who got selected in CGI belongs to Lucknow. Farah did not get selected for Capgemini. Either Charlie or Farah got selected in TCS, but neither of them belongs to Patna or Lucknow. Anand belongs to Kanpur, and he got selected for either Amazon or TCS. Farah doesn't belong to Delhi.

- 1) Which city does Anand belong to?
- 2) Which company did Anand get selected for?
- 3) Who belongs to Lucknow?
- 4) Who got selected for TCS?
- 5) Which city does Farah belong to?

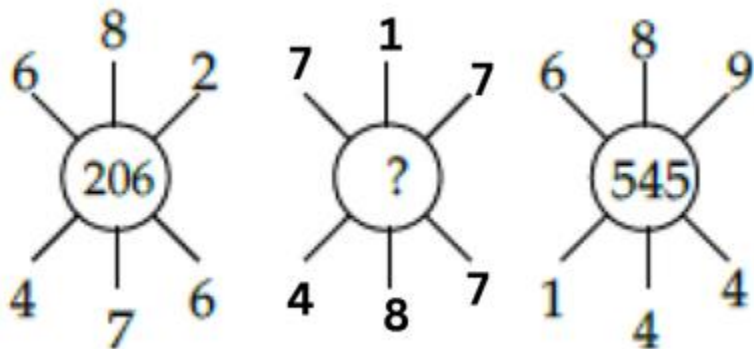

8. What number will replace the question mark?

9) What number will replace the question mark?

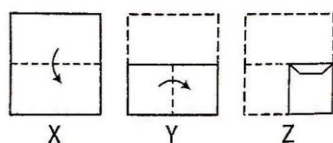

10. What number will replace the question mark?

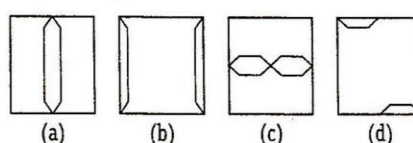

MODULE V: Counting figures & Visual reasoning

- 1) The mirror image of the given combination. "76MP0J"
- 2) A clock seen through a mirror show quarter to three. What is the correct time shown by the clock?
- 3) The mirror image of the given combination. "PADMA BHUSHAN"
- 4) The wetter image of the given combination. "VISHAVIDYAPEETH"
- 5) The wetter image of the given combination. "MANAGEMENT"
- 6) A piece of paper is folded and cut as shown below in the question figures. From the given answer figures, indicate how it will appear when opened

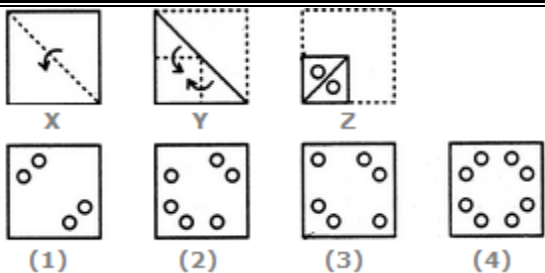

Question Figures

Answer Figures

- 7) Choose a figure which would most closely resemble the unfolded form of Figure (Z)

8) Select a suitable figure from the Answer Figures that would replace the question mark (?).

9) Select a suitable figure from the Answer Figures that would replace the question mark?

10) Look at the given figures and find the odd one out. Choose the correct option?

LONG QUESTION

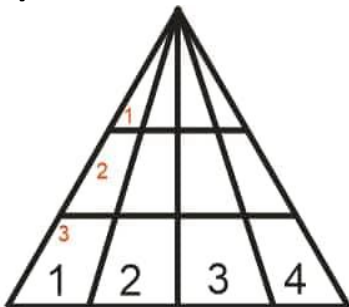

1) Count the Number of Squares and Rectangles.

1	2	3	4	5	6
2					
3					

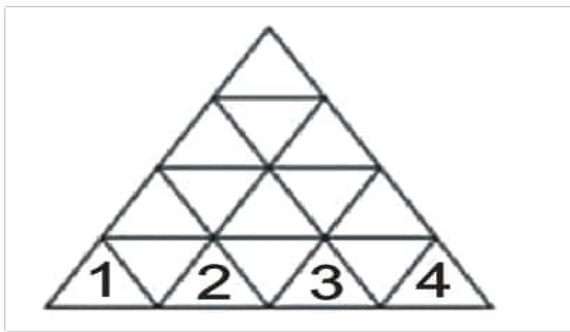

2) Count the Number of Squares and Rectangles.

1	2	3	4	5	6
2					
3					
4					
5					
6					

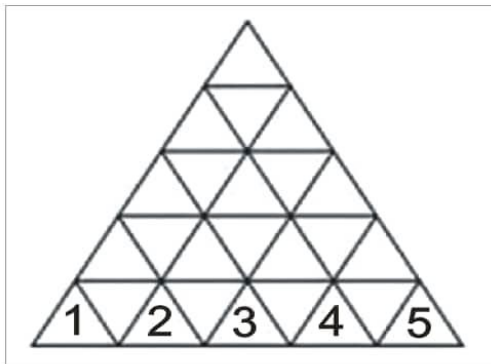

3) Count the Number of Triangles

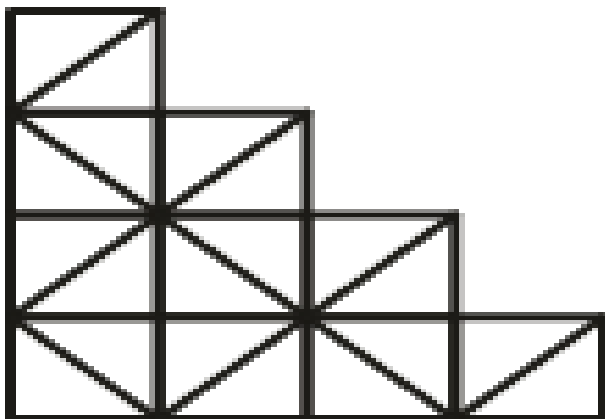

4) Count the Number of Triangles

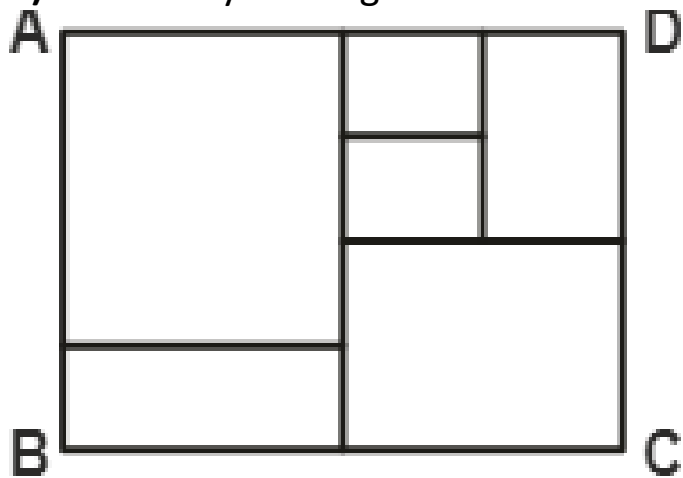

5) Count the Number of Triangles

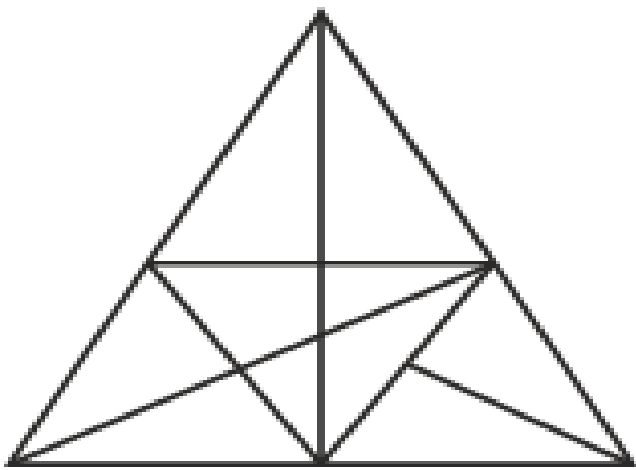

6) How many squares are there in the given figure?

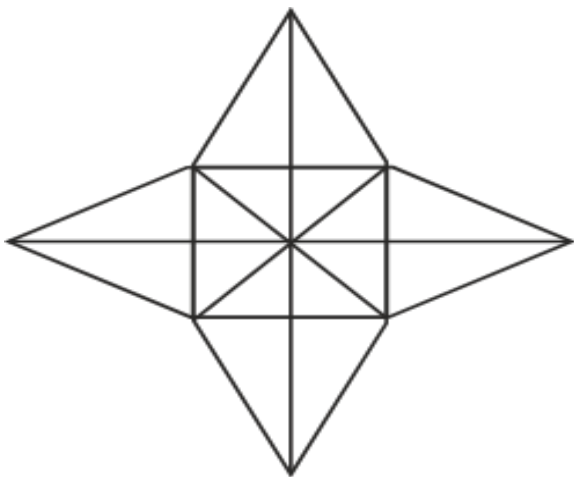

7) How many rectangles are there in the given figure?

8) Count the Number of Triangles

9) Count the Number of Triangles

10) How many triangles are there in the given figure?
